UMS set to become world class research institution

KOTA KINABALU: Universiti Malaysia Sabah (UMS) is striving to be on par with the more advanced world-class research institutions, particularly in the field of semantic technology, said its vice-chancellor Prof Datuk Dr Kamaruzaman Ampon.

Toward this ends, he said UMS, in collaboration with the Malaysian Institute of Microelectronic Systems (Mimos Berhad), held a joint symposium here as a platform to create public awareness on the concept of semantic technology.

Kamaruzaman said this signified a positive development and would surely assist in realising the government's aspirations to create a knowledgeable society.

"This is the kind of synergy that we, as Malaysian researchers need to have, to be on par with the more advanced world-class research institutions," he said. — Bernama
