Mindteck (India) Limited (BSE: Mindteck), a global product engineering and IT solutions company, has signed a Memorandum of Understanding (MoU) with MIMOS, a technical Research and Development Organization in Malaysia to drive Enterprise Knowledge Management in its offerings worldwide. Under the Memorandum of Understanding (MoU) MIMOS will collaborate with Mindteck and transfer IP developed by MIMOS with a view to developing specific solutions for Mindteck's global clients. Mindteck will adapt MIMOS' IPs like Enterprise Knowledge Management ('EKM') Framework in its Business Intelligence suite of solutions

The MoU was signed by Suresh Rao, Group CFO, Mindteck and Dato' Abdul Wahab Abdullah, CEO, MIMOS in the presence of a fifteen member high level delegation from Malaysia, headed by Y.B. Datuk Seri Dr. Maximus Johnity Ongkili, Minister for Science, Technology & Innovation.

The EKM framework that MIMOS has developed is an interoperable framework that allows ISVs to create a presentation desktop for individual users of an enterprise. Built on WPF technology, it has 2 versions – Client and Web (Sliverlight). The widgets are built on the framework using Visual Studio and can consume any services that are exposed. With this tool a CXO can call for any information within the enterprise on his desktop with the help of the widgets. The framework allows user to access various web services and uses semantic technology related to these services. The widgets relate with each other and form an intelligent user friendly desktop application.

Speaking on the alliance, Mr. Suresh Rao, Group CFO, Mindteck said, "We are excited about this partnership with MIMOS which will further strengthen the longstanding ties that Mindteck has developed with the Malaysian Government. The MoU will reinforce our commitment to provide the best of technological resources to our customers worldwide."

Talking about the joint initiative, Dato' Abdul Wahab Abdullah, CEO, MIMOS said "MIMOS and Mindteck will work in collaboration and put to play the IPs developed by MIMOS so that specific solutions can be developed for Mindteck's global clients in various industry verticals. Mindteck with their strong presence in the global market can better position themselves in their offerings to customers and be more competitive by adapting MIMOS' IPs."

Emphasizing on the strategic relevance of this partnership for the Indo-Malaysian technology trade alliance, Y.B. Datuk Seri Dr. Maximus Johnity Ongkili, Minister for Science, Technology & Innovation said, "Mindteck already has a strong presence in Malaysia and this partnership will further strengthen the existing ties between Mindteck and the Malaysian Government."
