Mimos, Cisco to set up network centre

MIMOS and Cisco Malaysia recently signed a Memorandum of Understanding (MoU) to formalise their collaboration to establish the Asian Centre of Excellence in Networking Technologies (ACENT).

Mimos was represented by its president and chief executive officer (CEO) Datuk Abdul Wahab Abdullah and Cisco Malaysia by its managing director, Kumaran Singaram.

Among others, ACENT, to be located at MIMOS in Technology Park Malaysia, Bukit

Jalil, will assist in developing and testing prototypes of new networking technology products for proof-of-concept.

It will also simulate and test new technology products prior to development or production as well as simulate and test of disaster recovery technology, processes and protocols.

The centre will also plan, simulate and test technology migration, and develop indigenous skills and capability in advance networking technologies.
