TECH GOING GLOBAL

MIMOS Berhad, an applied research centre in frontier technologies under the Ministry of Science, Technology and Innovation, signs a Memorandum of Understanding with Mindteck (India) Limited, which will adopt and market MIMOS' IT solutions – the Enterprise Knowledge Management System (eKMS).

The eKMS framework can be used across multiple verticals to develop industry specific solutions for the public, energy, semiconductor, banking and financial services, as well as insurance sectors amongst others.

Says Science, Technology and Innovation Minister Datuk Seri Dr Maximus Ongkili: "The collaboration will enhance and globalise MIMOS' Intellectual Property portfolio, (as well as) strengthening Mindteck's position in the market place."

The eKMS is the first MIMOS-developed IT technology to be taken up by an Indian IT company. **bi**
