KUALA TERENGGANU, June 25 (Bernama) -- Universiti Malaysia Terengganu (UMT) today signed a Memorandum of Understanding (MoU) with Mimos Bhd to expand cooperation network in the field of physics.

Its vice-chancellor, Prof Datuk Dr Nor Aieni Mokhtar, said the collaboration will focus on teaching and key research of physics involving nano-semiconductor technology, which is the main speciality of Mimos Bhd.

"The signed MoU will be a catalyst or a platform for the research network in related fields as of now and beyond.

"Through this collaboration, various methods and approaches that can benefit into the nano-semiconductor technology aspects will be explored.

"UMT also take pride as Mimos Bhd will provide industrial placement for the physics programme under its School of Fundamental Science next year," she said....
